

# Vaccine Information Statements (VIS)

What is a VIS?

Why are VIS important?

Where can I find a VIS?

- VIS are forms created by the CDC that provide information about vaccines.
- VIS have important information about each vaccine you or your child is about to receive as well as after care facts.
- Your health care provider may give you a copy, provide a laminated version or even display it on a monitor for you to read. You may also go to [WhyImmunize.org/vaccine-safety](http://WhyImmunize.org/vaccine-safety).

**Take a Picture Now & Be Prepared for Each Well Visit**

On time vaccinations help keep you and your family healthy and well.

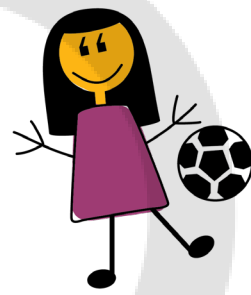

## What Vaccine Information Statement Will You Need To Review?

### Babies

HepB  
Rotavirus  
DTaP  
PCV13 (Pneumococcal)  
Polio  
MMR  
HepA  
Varicella  
Flu

### School Age Children

Tdap  
MMR  
Polio  
Varicella  
Flu

### Teens

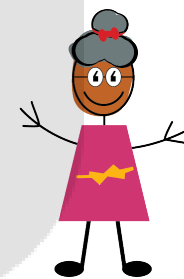

Tdap  
HPV  
Meningococcal ACWY & B  
Flu

### Adults

Tdap | HPV | Shingles | PPV (Pneumococcal) | Flu

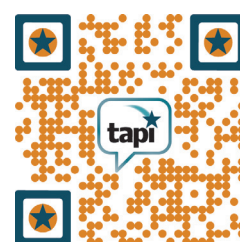

Remember to ask your health care provider for a copy of, or to review the VIS at **each vaccine visit**.
