COVID-19 vaccine will not give you COVID-19.

COVID-19 vaccines will not cause you to test positive on COVID-19 viral tests.

Getting vaccinated will help provide protection against COVID-19.

Pregnant women can get vaccinated to protect themselves and their babies.

If you have had a previous allergic reaction to injectable vaccines & medication or have previously had COVID-19, talk to your health care provider about getting your COVID-19 vaccine.

PLEASE continue to wear a mask, even after you get vaccinated, to help prevent the transmission of COVID-19

Everyone can get vaccinated. You don’t need to have health insurance or be a U.S. citizen or resident.
