2015-2019-2024  
From Access.org

William Uninsured Program (UIP) Assessment Verification Access Partnership For Immunization 2012-2019-2024  
Dear Partner Site:  
The U.S. Department of Health and Human Services (HHS) Health Resources and Services Administration (HRSA) has contracted with Williams Adley & Company (W.A.C.) (Williams Adley) a certified public accounting and management consulting firm, to carry the Uninsured Program (UIP) Assessment for the Access Partnership for Immunization for the following sites: [list of sites]  
The objective of this assessment is to:  
1. Determine the Access Partnership for Immunization (API) (API) has implemented and utilized financial, administrative, and medical record practices in compliance with UIP from implementation through completion under applicable federal contract and regulations.  
2. Determine whether the UIP data management system established in accordance with the HRSA Uninsured Program Data and Evaluation (UIP) and other legal requirements.  
3. Determine whether the UIP data management system established in accordance with the UIP is secure and protected by appropriate security controls.  
4. Determine whether the UIP data management system established in accordance with the UIP is secure and protected by appropriate security controls.  
5. Verify that the UIP data management system established in accordance with the UIP is secure and protected by appropriate security controls.

### Get Vaccinated

Arizona pediatricians talk vaccines

Across the state of Arizona, pediatricians support families in caring for their children's health and well-being.

The Arizona Department of Health Services, in partnership with Arizona Chapter of the American Academy of Pediatrics (AZAAP) and the Arizona Partnership for Immunization (API), teamed up to speak with medical professionals from different areas of the state and walk of the about why vaccines are critical tools in their practices for building healthy families and communities.

**Community Awareness Committee Meeting**

Wednesday, October 16, 2024  
9:00am - 10:00am

# Let's Keep these Diseases in the Past...

**Hepatitis B (HepB)** - A virus that causes liver infection that can lead to liver damage, liver cancer or liver failure.

**Rotavirus (RV)** - Severe diarrhea, fever and vomiting leading to dehydration and hospitalization.

**Diphtheria (DTaP)** - A severe throat infection that makes it very hard to swallow and breathe.

**Tetanus /Lockjaw (DTaP)** - Stiffness in neck, painful muscle spasms and breathing difficulties.

**Pertussis/Whooping Cough (DTaP)** - At first a mild cough that keeps getting worse. The coughing fits can cause breathing difficulties, hospitalization and death.

**Haemophilus influenzae type b (Hib)** Joint, eye, ear and lung infections and meningitis which can lead to brain damage.

**Hepatitis A (HepA)** - A virus that causes liver disease, tiredness, loss of appetite, stomach pain, dark urine and jaundice (yellowing of skin and eyes).

**Polio (IPV)** - Can cause lifelong paralysis and deformity.

**Pneumococcal Disease (PCV)** - Pneumonia with cough and difficulty breathing; ear and sinus infections, fever, blood infection; and sometimes meningitis (an infection of the lining around the brain and spinal cord).

**Influenza (Flu)** - High fever, cough, sore throat, and extreme fatigue. It can lead to breathing difficulties, hospitalization and death.

**Measles (MMR)** - High fever, pinkeye and cold-like symptoms followed by rash. It can lead to diarrhea, ear infection, pneumonia, blindness, brain damage and death.

**Mumps (MMR)** - Painful swelling of the cheeks and jaw, headache and fever. It can lead to hearing loss or inflammation of the brain.

**Rubella/German Measles (MMR)** - Rash starting on the face, then spreading to the body. A pregnant woman who gets rubella can lose her baby or have a baby with severe birth defects.

**Pneumococcal Disease (PCV)** - Pneumonia with cough and difficulty breathing; ear and sinus infections, fever, blood infection; and sometimes meningitis (an infection of the lining around the brain and spinal cord).

**Varicella (Chicken Pox)(VAR)** - Fever, tiredness and an itchy, blister-like rash. Infected blisters can cause serious illness.

**Pneumococcal Disease (PCV)** - Pneumonia with cough and difficulty breathing; ear and sinus infections, fever, blood infection; and sometimes meningitis (an infection of the lining around the brain and spinal cord).

**Varicella (Chicken Pox)(VAR)** - Fever, tiredness and an itchy, blister-like rash. Infected blisters can cause serious illness.

## Where They Belong.

While flip phones, cassette players and 90's music are back in, many of us do not even recognize the diseases above. That is because of vaccines!

Talk with your health care provider about any vaccine questions you have. Vaccination on time is the best defense against these diseases.

**Together, we can help our children experience the good parts of our past.**
