

Vaccines KEEP THESE Diseases IN THE Past, WHERE THEY BELONG

Flip phones, record players and 90's music, all from the past, are back in today. Something else from the past are the diseases shown below. Thankfully, most of us do not recognize these diseases. That is because of vaccines! Vaccines have been helping protect our community since the early 1900's.

Together, we can help our children experience the good parts of our past.

Talk with your health care provider about any vaccine questions you may have.

LAS VACUNAS MANTIENEN ESTAS ENFERMEDADES EN EL PASADO, DONDE PERTENECEN

Los teléfonos plegables, los tocadiscos y la música de los 90-todas cosas del pasado-han vuelto a estar de moda hoy. Otra cosa del pasado son las enfermedades que se muestran a continuación. Afortunadamente, la mayoría de nosotros no hemos conocido estas enfermedades. **Eso es gracias a las vacunas!** Las vacunas han ayudado a proteger a nuestra comunidad desde principios del siglo 1900's.

Juntos, podemos ayudar a nuestros hijos a experimentar las partes buenas de nuestro pasado.

Habla con tu proveedor de atención médica sobre cualquier pregunta que puedas tener sobre las vacunas.
